Campus Address

2001 Longxiang Blvd
Longgang, Shenzhen

Permanent Address

Kebon Kacang XXXIX
Tanah Abang, Jakarta Pusat

SUMMARY

Computer Science and Engineering undergraduate at The Chinese University of Hong Kong, Shenzhen (CUHKSZ), with a background in developing and deploying scalable applications. Proficient in Java and C++. Experienced in implementing efficient systems and data transfers using SQLite. Strong communicator with leadership experience as a peer advisor. Achieved multiple certificates and scholarships for academic excellence and research.

EDUCATION

The Chinese University of Hong Kong, Shenzhen

Sep 2023 - Present

- School of Data Science: B. Eng. in Computer Science and Engineering
- Expected Graduation: May 2027 | GPA: 3.62/4.0
- Relevant Coursework: Operating Systems, Computer Architecture, Linear Algebra, Discrete Mathematics, Data Structures, Database Systems, Algorithms, Machine Learning, Speech and Language Processing

EXPERIENCE

Peer advisor

Sep 2024 - May 2026

The Chinese University of Hong Kong, Shenzhen

- Provided guidance and materials for more than 40 first-year students in the School of Data Science.
- Collaborated with academic advisors and other peer advisors to organize activities and provide consultations and assistance regarding the school, majors, and coursework.

PROJECTS

Underwater Image Enhancer with Classical Restoration and Attention Residual U-Net

Jun 2026 - Jul 2026

- Developed a two-stage underwater enhancement model using a classical restoration pipeline (red channel correction, dark channel prior dehazing, CLAHE) with an attention-gated residual U-Net, trained with a hybrid L1+SSIM loss to learn bounded residual corrections.
- Achieved 19.89 dB PSNR and 0.8311 SSIM on UIEB, outperforming Water-Net, CycleGAN, fusion, and multiscale dense GAN baselines; the classical pipeline alone already beat all baselines in SSIM (0.8216).

Informal Context Normalization Model using LSTM with Attention

Sep 2025 - Dec 2025

- Developed a character-based bidirectional LSTM encoder-decoder model with additive attention to normalize informal social media language by disambiguating abbreviations using context focus.
- Performed evaluation on the LexNorm 2015 dataset and attained an accuracy of 82.1% and a BLEU score of 74.5%, which is a 5.6% improvement over the baseline LSTM model without an attention mechanism.

University Information Database Management System

Sep 2024 - Dec 2024

- Collaborated with four individuals to design and create an information management system using C++ for system interface and programming.
- Established features such as student record management, course registration, and student calendars were implemented by combining object-oriented programming in C++ with query generation from built-in tables in SQL-based databases

HONORS AND AWARDS

CUHKSZ, 1st Undergraduate Research Conference Certification

Feb 2025

- Analyzed the impact of artificial intelligence (AI) on undergraduate students in the art and non-art fields and established research on the topic.
- Obtained a certification by presenting my research in front of undergraduates and professors.

RevoU, Software Engineering Course Certification

Jul 2024

- Developed an integration of front-end (HTML, JavaScript, CSS) and back-end (Java) of a *Wildcard Pattern Matching*, a project that gives a string and a pattern that includes wildcard characters and determines if the pattern matches the entire string.
- Passed all assessments, including projects and exams, with full marks.

CUHKSZ, Half Tuition and Full Accommodation Scholarship

Feb 2023

- Selected for a competitive scholarship based on academic excellence and firm performance
